

## Additional Manual Freeride Lite

### 1. Attaching the cartridge

- Open Velcro closure at right airbag pocket
- Open inside zipper
- Open zipper of top pocket

- Insert cartridge through zipper opening in the right airbag compartment and screw it tightly into the black plastic mount
- Use your right hand through top zipper pocket for counter pressure
- Close inside zipper after attaching cartridge

### 2. Strap Handling

- Close hip strap with Velcro. Weight of backpack should sit on hips
- Tighten shoulder straps, most of the weight should still be on hips
- Close metal clasp of safety belt on top of hip strap. Only this strap with the metal clasp will withstand the force on an avalanche
- Close chest strap above chest, (adjustable height)
- Pocket on hip strap adjusts to different heights

### 3. Attaching leg straps

- To attach leg straps open front clasp
- Feed through legs from behind
- Close clasp
- Leg straps are only necessary if safety belt is worn loosely

# Additional Manual for Escape Freeride

## 4. Attaching shovel and probe
